

NANOKERATIN SYSTEM® **HAIR THERAPY TREATMENT**

NanoKeratin Frequently Asked Questions:

Q. What is unique about the Nanokeratin System treatment, how is it different than other hair repair systems?

A. The Nanokeratin based treatment is a revolutionary hair repair system.

The system utilizes nano-molecular keratin, whose particles are so miniscule that millions of them can be gathered onto a pin head! The Nanokeratin particles are deposited and locked deep within the damaged hair, sealing it naturally, to repair hair and restore it to health. Other types of treatment utilize molecules that are so large that they are unable to penetrate the strands of hair. But the miniscule Nanokeratin molecules penetrate deep within each strand, ensuring the treatment's long lasting results.

Q. Can Nanokeratin System straightening treatment be used after coloring?

A. Yes, for best results it is recommended to use the Nanokeratin System treatment immediately after coloring or lightening your hair

Q. Is it possible to perform Nanokeratin System straightening on hair that has been chemically treated?

A. Yes, Nanokeratin System Brazilian straightening treatment may be used on hair that has gone through any type of chemical treatment.

Q. Is it possible to perform Nanokeratin System straightening treatment on hair that has been straightened?

A. Yes, it may be used on any type of hair that has been straightened.

Q. Can Nanokeratin System straightening treatment be used on highlighted hair?

A. Yes, Nanokeratin System Brazilian straightening treatment may be done immediately following highlighting.

Q. Can Nanokeratin System straightening treatment be used for children and if so, from what age?

A. Yes, we recommend using Nanokeratin System straightening treatment for children from age 6 and up

Q. Is it possible to color hair when using Nanokeratin System straightening treatment?

A. Yes, we recommend coloring hair prior to using Nanokeratin System straightening treatment.

Q. What should I do if my hair gets wet within the first four days after the Nanokeratin System straightening treatment?

A. Dry your hair as quickly as possible using a blow dryer, ceramic straightening iron or titanium surfaced straightening iron.

Q. Can hair be colored after the Nanokeratin System straightening treatment?

A. Yes, but we recommend waiting at least two weeks after the Nanokeratin System Brazilian straightening treatment before coloring.

Q. Can I shampoo my hair after the treatment and if so, how long should I wait?

A. Yes, but wait four full days after the treatment before shampooing

Q. What should I do if my hair gets wet within the first four days after the Nanokeratin treatment?

A. Dry your hair with a titanium surfaced hair straightener.

Q. Can I swim in a pool or the sea after the Nanokeratin system treatment?

A. Yes, but wait four full days after the treatment before doing so

Q. What shampoo should I use after the treatment?

A. We recommend Nanokeratin Hair Power shampoo, as it does not contain chloric sodium. It does contain, however, keratin RSF and protects against harmful sun rays.

Q. For my next Nanokeratin system treatment, is a touch-up enough, or do I have to perform the process on my whole head?

A. The process should be performed on your whole head.

Q. When should the treatment be repeated?

A. Treatment should be repeated every six months, or as needed.

Q. Can the Nanokeratin system treatment be repeated monthly?

A. Yes, it is possible to do so.

Q. Should hair be trimmed prior to using the Nanokeratin system?

A. No, we recommend trimming your hair after treatment, in order to remove split ends

Q. Can hair spray, gel, mousse, or other hair care products be used after the Nanokeratin system treatment?

A. These products should absolutely NOT be used during the four days following the treatment, as they might adversely affect the effectiveness of the treatment.

Q. What should I do if my hair becomes wavy during the night or during the four days immediately following the treatment?

A. Use a blow dryer or a titanium straightener to straighten the waves.

Q. Can the treatment be performed during pregnancy or while breastfeeding?

A. The U.S. Department of Health does not recommend having the treatment during pregnancy or while breastfeeding.

Q. Can a baby be present in the room during the treatment?

A. Preferably not, because the odor released during the treatment might irritate the baby's respiratory system..

Q. What hair mask may be used after the Nanokeratin system straightening?

A. Following the straightening, the Nanokeratin Hair Power mask is recommended.

Q. Is it possible to perform Nanokeratin system straightening on hair that has been chemically treated?

A. Yes, it may be used on hair that has gone through any type of chemical treatment.

Q. What types of complimentary treatments may be used following Nanokeratin system Brazilian straightening?

A. After the straightening we recommend treatment with Nanokeratin Spa Dipping

Q. Is the system safe for everyone?

A. Yes, the system is completely safe for adults and children

Q. Is the system appropriate for all hair types?

A. Yes, but the system is especially effective for damaged or coarse hair, such as bleached, colored or lightened hair, hair extensions made from natural hair or sun damaged hair.

Q. How effective is Nanokeratin system straightening?

A. The system is 100% effective at straightening and repairing damaged hair.

Q. How long does the Nanokeratin system treatment and hair repair take?

A. The system treatment and hair repair take approximately 40 minutes for short hair and 90 minutes for long hair

Q. Can the treatment be applied to people who suffer from hair shedding or dandruff?

A. Yes, but not for the purpose of solving these problems. In order to treat hair shedding we recommend using the Hair Power hair loss treatment kit.
